## **DETAILED ACTION**

### ***Information Disclosure Statement***

The listing of references in the Search Report is not considered to be an information disclosure statement (IDS) complying with 37 CFR 1.98. 37 CFR 1.98(a)(2) requires a legible copy of: (1) each foreign patent; (2) each publication or that portion which caused it to be listed; (3) for each cited pending U.S. application, the application specification including claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion, unless the cited pending U.S. application is stored in the Image File Wrapper (IFW) system; and (4) all other information, or that portion which caused it to be listed. In addition, each IDS must include a list of all patents, publications, applications, or other information submitted for consideration by the Office (see 37 CFR 1.98(a)(1) and (b)), and MPEP § 609.04(a), subsection I. states, "the list ... must be submitted on a separate paper." Therefore, the references cited in the Search Report have not been considered. Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a).

### ***Specification***

1. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. **Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:**

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or  
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

***Claim Objections***

2. Claims 4-22 and 24 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only and cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites the limitation "the front ends" in line 16. There is insufficient antecedent basis for this limitation in the claim.

Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Novak et al. (US 6,193,273). Regarding claim 1, Novak et al. discloses a vehicle chassis

including: two longitudinal side rails (78, 80) each having a central portion (see Figure 1) and a front portion (at about 16); a first cross member (40) extending in a transverse direction between the side rails and a second cross member (see Figure 1) extending in a transverse direction between the central portions of the side rails; two secondary longitudinal members (14) extending between the first cross member (40) and the second cross member (42, see Figure 1), and the secondary longitudinal members are each connected to the side rails by means of a central support section (12) which is longitudinally spaced between the first and second cross members, characterized in that the front portions are arranged in use to be higher than the central portions (see Figure 1) and the first cross member (40) extends between the front ends of the side rails and is arranged to be, in use, below the front ends of the side rails over a substantial part of its length (see Figure 1). Regarding claim 2, Novak et al. discloses the first cross member (40) is connected to the side rails (78, 80) by means of vertically extending front support sections (see Figure 1). Regarding claim 3/1 or 3/2, Novak et al. discloses having a secondary longitudinal member (14) connected to the first cross member lower than the front ends of the side rails (see Figure 1).

6. Claims 1-3 rejected under 35 U.S.C. 102(b) as being anticipated by Kocer et al. (US 6,428,046). Regarding claim 1, Kocer et al. discloses a vehicle chassis including: two longitudinal side rails (16) each having a central portion (16a) and a front portion (16d); a first cross member (34) extending in a transverse direction between the side rails and a second cross member (20) extending in a transverse direction between the central portions of the side rails; two secondary longitudinal members (22) extending

between the first cross member (34) and the second cross member (20), and the secondary longitudinal members are each connected to the side rails by means of a central support section (24) which is longitudinally spaced between the first and second cross members, characterized in that the front portions are arranged in use to be higher than the central portions (see Figure 2) and the first cross member (34) extends between the front ends of the side rails and is arranged to be, in use, below the front ends of the side rails over a substantial part of its length (see Figure 2). Regarding claim 2, Kocer et al. discloses the first cross member (34) is connected to the side rails (16) by means of vertically extending front support sections (26). Regarding claim 3/1 or 3/2, Kocer et al. discloses having a secondary longitudinal member (22) connected to the first cross member lower than the front ends of the side rails (see Figure2).

### ***Conclusion***
